APTERA s.l.

Zur Apterygotenfauna Norwegens, LINNANTEMI Bergens Mus. Aarb. 1911 No. 1.

In 1907 a paper by von OLFERS was recorded as follows:—

“Olfers, E. W. M. von. Die „Ur-Insecten“. (Thysanura und Collembola im Bernstein.) Königsberg Schr. physik. Ges. 48 1907 (1–40 mit 25 Taf.). 2070”

No new genera or species were however mentioned as included in the paper. The German Bureau has now forwarded for inclusion in this Issue a list of new genera and species contained

in the paper, together with the following explanation:—

“Die Arbeit ist aufgenommen in *Paläontol.*, Jg. 1908 und *Zool.*, 1907. aber ohne neue species. Diese sind als solche weder vom Verf. bezeichnet, noch ist sonst aus der Arbeit ersichtlich, dass sie neu sind. Ich habe sämtliche Namen ausgezogen, die mit der Bezeichnung „v. Olf.“ in der Arbeit versehen waren. Die Angabe, dass es sich um Neubenennungen handelt, rührt her von F. Poche im Arch. f. Naturgesch., Berlin, Bd 77, I, suppl. H 4, 1912.—Bedauerlich ist, dass (durch die Schuld des Deutschen Bureaus) die Bezeichnung der Geologischen Schicht im Bände Paläontologie ganz falsch ist, nämlich 90. 95 statt 85. Es handelt sich, wie der Titel sagt, um Bernstein-Insekten.”
